

The park recycling bin is used within the parks & gardens of the municipality excluding Docklands, located adjacent to paths & major traffic routes. It should be placed within entrances and areas where people are likely to sit and consume food or drink. The recycling bin will often be positioned alongside a litter bin.

The recycling bin is fabricated from perforated mild steel powder coated in 'Blaze' Blue and is serviced by an 80 litre plastic wheeled bin.

For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 903221 - 80L RECYCLE BIN
