

Elevation

Plan

The self-cleaning toilet is used in parks & gardens and streetscapes throughout the municipality.

The toilets must be placed adjacent to streets in accordance with the City of Melbourne Toilet Strategy.

The self-cleaning toilet has a disabled toilet pan, and a separate hand wash room.

Toilet walls are fabricated using a galvanised steel frame with grade 316 stainless steel sheet lining to the exterior & interior faces. The roof is also fabricated using a galvanised steel frame with grade 316 stainless steel sheet lining to the exterior. The floor structure is a reinforced concrete slab.

For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 901211\_F\_Self Cleaning Automatic Toilet
